

A Warm Reminder Before Use

Precautions Before Use

Before use, it is not recommended to use or use under professional guidance if you have following status.

1. There are implants in the body, such as stents, nails, steel plates, etc.
2. Not recovery after surgery.
3. Pregnant Lady.
4. Patients with severe hypertension and heart disease.
5. Child: Under 3 years.
6. Drunk.
7. Patients with severe osteoporosis (people who will be fractured with a little stress, regardless of age).
8. Venous thrombosis

Precautions Before Use

Before using, we must know that iRelaxBot Physiotherapy Robot is not only a good physiotherapist, but also a good sub-health screener!

- If you have a serious physical reaction during the use of iRelaxBot physiotherapy robot, it means that your body has serious health problems, and you need to check it in time; it also shows that iRelaxBot has a significant impact on your physical health. Very good rehabilitation conditioning and repair effect but need to adjust the frequency of use based on physical experience.
- The transition of a human body from a sick state to a healthy state needs to go through a process: sick state---treatment period---rehabilitation period---conditioning and repair period---maintenance period---healthy state. During each process, there will be some reactions in the body.
- Don't be nervous, communicate with the sales or service agency in time to facilitate better use.
